Empathy Map

SAYS • I need to predict the Human Development Index quickly. • The prediction system should be easy to use. • I want accurate and reliable prediction results.	THINKS • Will the predicted HDI value be accurate? • Are the selected indicators sufficient for prediction? • Can this system support better decision-making?
DOES • Enters socio-economic indicators into the application. • Reviews the predicted HDI value and category. • Compares results for different input values.	FEELS • Curious about the country's development level. • Confident when the system provides accurate predictions. • Frustrated if manual calculations are required.
