

Project Executable Files

Date	2 July 2026
Team ID	
Project Name	Human Development Index (HDI) Prediction – A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

```
HDI_Prediction_Project/
|
├─ app.py
├─ HDI.pkl
├─ Human_Development_Index.csv
├─ requirements.txt
├─ README.md
|
├─ templates/
|   ├── index.html
|   └─ result.html
|
├─ static/
|   ├── style.css
|   └─ images/
|
├─ notebook/
|   └─ HDI_Prediction.ipynb
|
└─ screenshots/
    ├── home_page.png
    ├── prediction_result.png
    └─ flask_terminal.png
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed (Local Flask Application)
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Flask Development Server
Repository Link	https://github.com/Santhoshi003/Human-Development-Index-Predictor
Demo Video Link	https://drive.google.com/file/d/1Px5ec6hmMCRiJotMJXiRjVGpo-w2tOnM/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Install Python 3.10 or later.
2. Open the project folder in VS Code or PyCharm.
3. Install the required libraries:

```
pip install -r requirements.txt
```
4. Start the Flask application:

```
python app.py
```
5. Open a web browser and go to:

```
http://127.0.0.1:5000/
```
6. Enter the required HDI parameters and click Predict to view the predicted HDI value and development category.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The application runs only on a local Flask server.	Can be deployed to Render, Railway, or Heroku in the future.
2	The prediction model uses only four socio-economic indicators.	Additional features can be added to improve accuracy.
3	No user authentication or database support is implemented.	Can be included in future versions if required.
